# II. Return as of June, 2021

The net return in US dollars was -0.87% in the month. This is broken down in the returns of Money Market and Sovereign Bonds portfolio,-1.00%, Sovereign Inflation Linked Bonds, -0.69%, and Equities, 1.31%. The negative returns of the Money Market and Sovereign Bonds and Sovereign Inflation Linked Bonds portfolios are explained by the depreciation (relative to the US dollar) of the currencies in which are invested. The return of the Equities portafolio is explained by the positive performance in local currency. The fund's monthly return measured in pesos was 0.54%. Finally, the accumulated return for the year is -3.22% in US dollars and 0.05% in pesos, while the annualized return since the beginning is 2.63% in US dollars and 4.89% in pesos.

a) Time Weighted Return (it's calculated as the growth rate of the funds that were invested throughout the period).

Returns for periods of more than one year are compound annualized rates while those for less than a year correspond to the change as seen in the stated period. With a view to meeting high standards of transparency and providing a better assessment of the gains or losses on investments, the Ministry of Finance discloses the fund's return in different time horizons and currencies. With respect to the horizon, it is important to note that, in keeping with the medium- and long-term investment policy, the return assessment should focus on that period, disregarding fluctuations that may occur monthly or quarterly. With regard to returns expressed in different currencies, the return in US dollars allows for an assessment which is more in line with the investment policy given that the fund's resources are wholly invested abroad and in foreign currency. The return in Chilean pesos is also disclosed. This return reflects changes in the peso-dollar exchange rate and, therefore, may experience greater fluctuations. Finally, as with any investment, returns obtained in the past do not guarantee future positive results.

<sup>(</sup>b) This item may include instruments issued by Supranational institutions, agencies and eligible entities with explicit government guarantee

<sup>(</sup>c) CLP return corresponds to the sum of the percentage change of the CLP/USD exchange rate and the USD return.
