II. Return as of April 2016

Return in US dollars was 1.31% in April. This result was due to the performance of Sovereign and Government Related Bonds, 1.59%, Inflation Indexed Sovereign Bonds, 0.09%, Corporate Bonds, 1.50%, and Equities, 1.49%. First two portfolios' results in US dollars were mainly explained by an appreciation of currencies like the euro, yen, British pound and Canadian dollar against the dollar, while their monthly returns in local currency were negative. Corporate Bonds' monthly return was positive both in US dollars and local currency, the latter due to the positive effect of a decrease in corporate spreads during April. Equities' performance was mainly due to the good results in the local markets. Return in Chilean pesos was -0.43% in April because of a depreciation of the US dollar against the peso. Year to date return was 6.52% in US dollars and 0.31% in pesos, while annualized return since inception was 3.71% in US dollars and 6.02% in Chilean pesos.

(a) Time Weighted Return (it is calculated as the growth rate of the funds that were invested throughout the period).
(b) It is calculated from March 31, 2007, when the performance of Central Bank of Chile started to be measured.

(c) Return in CLP corresponds to the sum of the percentage change of the exchange rate CLP/USD and the return in USD.

Returns for periods of more than one year are compound annualized rates while those for less than a year correspond to the change as seen in the stated period. With a view to meeting high standards of transparency and providing a better assessment of the gains or losses on investments, the Ministry of Finance discloses the fund's return in different time horizons and currencies. With respect to the horizon, it is important to note that, in keeping with the medium- and longterm investment policy, the return assessment should focus on that period, disregarding fluctuations that may occur monthly or quarterly. With regard to returns expressed in different currencies, the return in US dollars allows for an assessment which is more in line with the investment policy given that the fund's resources are wholly invested abroad and in foreign currency. The return in Chilean pesos is also disclosed. This return reflects changes in the peso-dollar exchange rate and, therefore, may experience greater fluctuations. Finally, as with any investment, returns obtained in the past do not guarantee future positive results.
