## An Update on COVID-19 in Chile

More than 48.5 million vaccines have been administered, with 90.6% of the target population completing the process (80.4% in the population under 18 years and 93.2% in the population over 18 years). Chile stands out for being the country with the largest share of population vaccinated with booster doses, reaching 72 per 100 inhabitants. In total, 12.9 million booster doses have been administered. Chile has begun the 4<sup>th</sup> dose vaccination process, starting with the immunocompromised population and healthcare workers.

### Cumulative Administered Vaccines

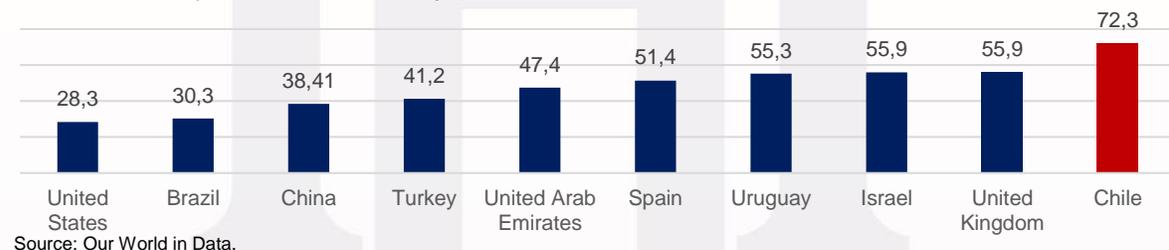

### Administered Doses per Age Group

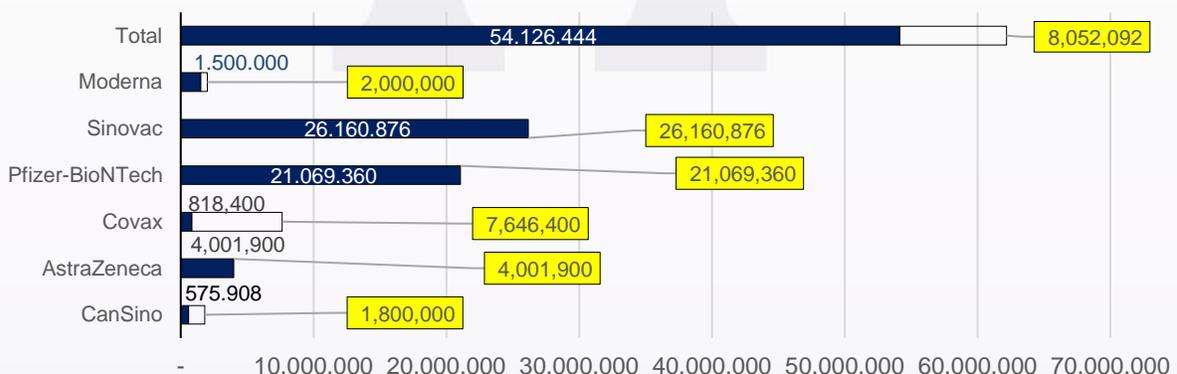

### Booster Doses Administered

Percent of Total Population, as of February 28, 2022.

Chile has received more than 54.1 million vaccines, mostly from SINOVAC and Pfizer-BioNTech.

### COVID-19 Vaccine Doses per Supplier: Received & Pending

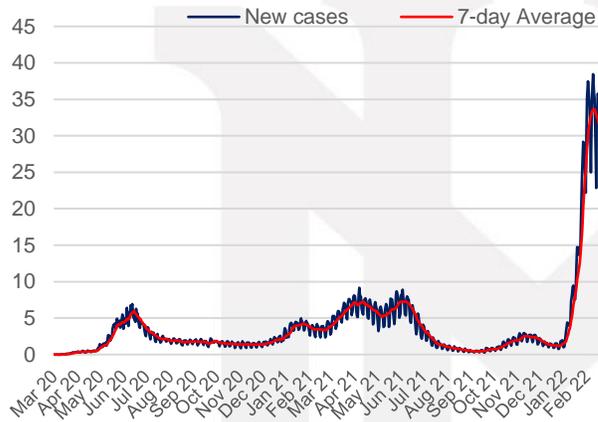

February 28<sup>th</sup>, 2022

During last weeks cases have been increasing as well PCR test positivity rates. Although both indicators have increased strongly, ICU occupancy levels, deaths and hospital capacity remain at moderate levels.

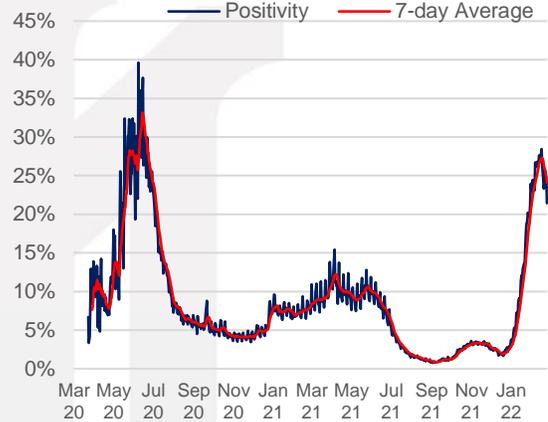

**COVID-19 Cases in Chile**

People (thousands), Data through February 6<sup>th</sup>.

**PCR Test Positivity Rate**

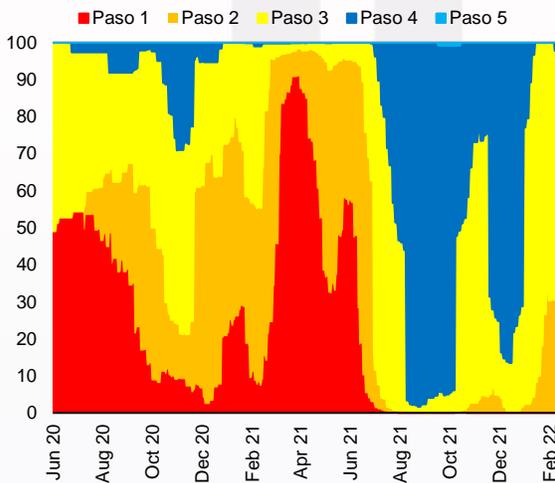

Data through February 6<sup>th</sup>.

Currently, 69.1% of the national population is in Paso 3 (Step 3) and 30.8% of its population is in Paso 2 (Step 2).

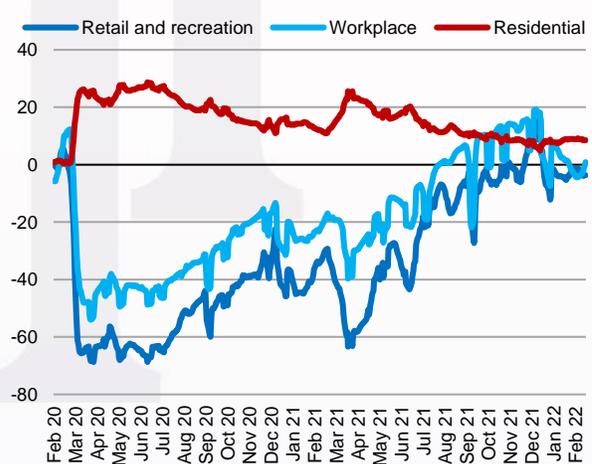

**Share of Population per Phase**
