## An Update on COVID-19 in Chile

More than 50.8 million vaccines have been administered, with 91.6% of the target population completing the process (84.0% in the population under 18 years and 93.5% in the population over 18 years). Chile stands out for being the country with the largest share of population vaccinated with booster doses, reaching 83 per 100 inhabitants. In total, 13.6 million booster doses have been administered. Chile has begun the 4<sup>th</sup> dose vaccination process, starting with the immunocompromised population, healthcare workers and people over 18 years old.
